EHR IN PRACTICE

ARIA® ONCOLOGY INFORMATION SYSTEM

EXTENDED PROFILE

VARIAN
medical systems

OVERVIEW

Varian's ARIA Oncology Information System is an oncology-specific EHR suite offering practice management functionality to improve and streamline practice workflows, financial administration plus reporting and other administrative procedures within medical, radiation and surgical oncology practices.

The ARIA Oncology EHR system allows physicians to evaluate diagnosis-specific data to compare acute responses to treatment and long-term clinical outcomes; develop disease-specific clinical protocols to facilitate a standard, consistent quality of care; monitor radiation dose and review treatment images to determine if plan changes are required; use rule-based workflows to support decision making and create structured oncology-specific care plans for post-treatment care and support of cancer patients.

Personalised care pathways can be created for every patient enabling practices to maintain complete problem lists; automate cancer staging; view lab reports, drug dosing, physical exam assessments and notes, plus document disease responses and track adverse events. ARIA EHR also manages chemotherapy and drug orders with access to a library of more than 300 disease-specific regimens and it also can check drug interactions.

More than 1,500 preconfigured reports can be used to generate real-time information on clinical outcomes, treatment responses, demographic data and survival rates. Insurance listing, billing and revenue plus costing are also supported.

Data and images can also be automatically shared with staff in other healthcare departments including pathology, radiology, pharmacy, labs and billing.

FEATURE OVERVIEW

- ✔ Patient Demographics
- ✔ Patient Portal
- ✔ Appointment Management
- ✔ Billing Management
- ✔ Medical Templates
- ✔ Document Management
- ✔ Clinical Workflow
- ✔ Patient History
- ✔ Reporting and Analytics
- ✔ Patient History / EMR
- ✔ Reporting / Analytics
