

BLUE EHR

EXTENDED PROFILE

OVERVIEW

Blue EHR, from ZH Healthcare, can be used across a wide variety of medical specialties including cardiology, dentistry, ophthalmology, radiology, and general practitioners.

As Blue EHR allows for full personalization, users are able to set up the system in a way that proves most productive for them, taking care of all processes and reporting without having to do it manually. Alongside this, pre-designed medical templates have been created to suit a wide range of medical specialties and the patient portal shows important data in one clear, easily accessible place.

Voice recognition software allows clinicians to upload patient data in real-time, whilst telemedicine and video features facilitate remote care. Other key features include billing, lab integration, scheduling, and reporting.

Blue EHR is suitable for any practice size, from solo physicians through to practices with over 1,500 users, and is available in multiple languages. As a cloud-based solution, it can be accessed from any device with an internet browser installed, with a native web app available for use on tablets and mobile devices.

BlueEHR is provided by ZH Healthcare, which is based in McLean, VA, and has a regional office in India. The software is fully compliant with HIPAA and ICD-10.
