

CERNER AMBULATORY EHR EXTENDED PROFILE

OVERVIEW

Cerner EHR is built for and designed by physicians to provide practices of sizes with fully functional medical software across specialties.

Cerner's Ambulatory solution allows physicians and practice staff to access patient information and perform workflows on mobile and tablet devices and supports voice dictation. All the workflows in Cerner EHR are customizable and support more than 55 different medical specialties.

The Cerner charting system uses a "Chart Search" function that reduces time spent seeking information. Boasting a user-friendly dashboard, Cerner Ambulatory EHR provides secure access to patient records. Ambulatory includes ePrescribe, nCode, electronic lab requisition, and results analysis which are designed to save time when making a diagnosis and reduce the possibility of human error.

The Cerner scheduling system is designed with administrative staff and patients in mind to be as user-friendly as possible.

IS CERNER AN EMR OR EHR

Cerner is an EHR (electronic health record) software, this is more comprehensive software than an EMR (electronic medical records) software as it has more capabilities beyond handling medical records, including practice management, charting, and medical billing.

IS THERE A DEMO OF CERNER EHR?

There is a demo video available for Cerner EHR on this profile using the demo button.

DOES CERNER EHR HANDLE MEDICAL BILLING?

Yes, the Cerner billing system is a feature of their EHR and is integrated with their software.
