

# MEDISOFT CLINICAL EXTENDED PROFILE

## OVERVIEW

Medisoft Clinical is an integrated EHR and practice management solution designed for independent physicians. The EHR helps doctors and other clinicians to manage to schedule and then streamline this to billing and also acts as a server-based EHR with a single-entry point for all clinical notes including diagnosis codes, notes, and any further charges.

Although the main selling point of the software is the efficiency and effectiveness of business practices, it also acts as a central resource for knowledge. The diagnosis functionality has ICD-10 level coding, to help with the searching for diagnoses. Medisoft Clinical also comes with a function to write off balances and to set a date for when balances will no longer appear on reports and statements.

Though installed on-premise, Medisoft Clinical comes with iOS and Android Mobile applications, these apps help practitioners and patients to collect administrative details, helping to practice users' time.
