EHR IN PRACTICE

# OFFICEEMR

# EXTENDED PROFILE

## OVERVIEW

OfficeEMR is a full EHR, practice management, and billing suite designed for small and medium-sized medical practices. The system has a series of pre-built templates which help medical professionals capture patient data quickly and accurately, reducing mistakes and therefore enabling physicians to bill and receive payment promptly.

OfficeEMR is entirely web-based and can be used on any operating system. A dedicated iPhone app captures charges while a physician is doing the rounds within a practice so that he or she does not have to perform billing activities during patient consultations. The OfficeEMR app also supports e-prescribing, remote patient charting plus capturing and viewing patient images.

OfficeEMR has a series of payment plans depending upon a practice's needs. The free plan includes cloud-based EHR and appointments, chart notes, e-prescribing, and e-labs support as well as two hours one on-one-training and template customization. The standard package includes billing, scheduling, and clearinghouse as well as eight hours of one-on-one training while the premium package adds on unlimited claims plus 20 hours of one-on-one training. A further outsourced billing plan is also available.

## FEATURE OVERVIEW

- ✔ Patient Demographics
- ✔ Patient Portal
- ✔ Scheduling
- ✔ Appointment Management
- ✔ Billing Management
- ✔ Clinical Workflow
- ✔ Insurance and Claims
- ✔ Lab Integration
- ✔ Patient History
- ✔ Reporting and Analytics
- ✔ Patient History / EMR
- ✔ Reporting / Analytics
