EHRIN PRACTICE

PRACTICE PARTNER

EXTENDED PROFILE

OVERVIEW

Practice Partner is a fully-integrated EHR and practice management solution designed for all specialties and sizes of practice. The aim of the software is to improve the quality of care and productivity,

eMDs Practice Partner EHR most notably does away with the superbill, which means financial clerks in practices can review and send charges to patients with only a few simple clicks. Practice Partner software comes with three applications, which can be bought as a package or as individual modules, allowing practices to scale the software as appropriate. These modules are patient records, medical billing, and appointment scheduling.

Practice Partner EHR software has its own Bright Note technology that allows for the automatic update of the whole chart by completing one single entry. This includes not only billing information but any problem lists or vital signs, allergies, or medications. The tools are customizable to each clinician's needs and templates can be set up for specific practices. There are speech recognition and transcription functions for complete ease of administration.
