

TOUCHWORKS EHR EXTENDED PROFILE

OVERVIEW

TouchWorks EHR is an EHR package developed for large, multi-discipline physician practices.

TouchWorks EHR is suitable for physicians and healthcare professionals who want to optimize their patient record handling. It is suitable for professionals working on-premise in healthcare facilities and in the field, at patients' homes, or in an ambulatory setting. TouchWorks combines patient records, care coordination, financials, analytics, and services into a modular, configurable solution.

TouchWorks EHR comes equipped with the Allscripts Wand feature, which gives users mobile access to patients' records making it suitable for patient visits or ambulances. Another key facet of the TouchWorks package is its Core Financial module, which uses a rules-based engine to streamline billing, optimize scheduling and manage cash flows.

TouchWorks EHR is a web-based, cloud solution that can be accessed via a browser or an iOS application. It is modular, meaning organizations only have to pay for the functionality they require. Pricing is based on a per module, per user, per month basis.
